**Science 4-5 - SolPass FORCES** . *A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest. Read "A Framework for K-12 Science Education: Practices ... Second, a focus on practices (in the plural) avoids the mistaken impression that there is one distinctive approach common to all science—a single “scientific method”—or that uncertainty is a universal attribute of science. Answers - The Most Trusted Place for Answering Life's ... Answers.com is the place to go to get the answers you need and to ask the questions you want Home |*
