 Ecosystem - Wikipedia *An ecosystem is a community made up of living organisms and nonliving components such as air, water, and mineral soil. Ecosystems can be studied in two different ways. They can be thought of as interdependent collections of plants and animals, or as structured systems and communities governed by general rules. The living and non-living components interact through nutrient cycles and energy flows.* **Editing and Custom Writing Service - Studybay.com** Studybay is an academic writing service for students: essays, term papers, dissertations and much more!
