10:23:00 GMT Archaeoastronomy - Wikipedia The history of science in early cultures refers to the study of protoscience in ancient history, prior to the development of science in the Middle Ages. In prehistoric times, advice and knowledge was passed from generation to generation in an oral tradition. The development of writing enabled knowledge to be stored and communicated across generations with much greater fidelity.

Australian Aborigines were some of the first people in the world to develop ideas with astronomy. It is possible that their interpretation of astronomy is the oldest still alive today. Studying astronomical subjects – such as the Sun, Moon, stars and planets – and the way they appeared to move was used as a way to find and explain the relationship between people, nature and the sky.
