Rudolf Carnap - Wikipedia *The logical syntax of language is a formal theory. It is not concerned with the contextualized meaning or the truth-value of sentences. In contrast, it considers the general structure of a given language and explores the different structural relations that connect the elements of that language.*

The Logical Syntax of Language - Google Books *Carnap maintained that the genuine task of philosophy was the logical analysis of the language of science. In The Logical Syntax of Language (1934), he introduced basic distinctions, such as object-language and meta-language, formal mode and material mode of expression, that were to be widely accepted in philosophy.*
