**Free [EBOOKS] Mutualistic Networks PDF** Wed, 05 Dec 2018 09:29:00 GMT Bascompte - Structure and dynamics of ecological networks Definition. A mycorrhiza is the symbiotic association between a green plant and a fungus. The plant captures the energy coming from the sun by means of its chlorophyll and supplies it to the fungus, and the fungus supplies water and mineral nutrients taken from the soil to the plant. <https://en.wikipedia.org/wiki/Mycorrhiza> Pollinator - Wikipedia A pollinator is an animal that moves pollen from the male anther of a flower to the female stigma of a flower. This helps to bring about fertilization of the ovules in the flower by the male gametes from the pollen grains.. Insect pollinators include bees, (honey bees, solitary species, bumblebees); pollen wasps (Masarinae); ants; flies including bee flies, hoverflies and mosquitoes ... Resolve a DOI Name Type or paste a DOI name into the text box. Click Go. Your browser will take you to a Web page (URL) associated with that DOI name. Send questions or comments to doi ... Susanne Renner's Homepage *Susanne S. Renner Stopped up-dates on 1 April 2017 Lab members and projects. References in google scholar. Papers in Researchgate. We are working on the systematics, biogeography, and evolution of plants. Long-standing interests are plant/animal interactions and the evolution of plant sexual systems and sex chromosomes.* **Polinizador - Wikipedia, la enciclopedia libre** *A diferencia de las abejas, las larvas de avispas se alimentan principalmente de insectos o arañas. Sin embargo los miembros de este grupo también visitan numerosas flores para libar el néctar por su valor energético. Éste es un grupo con numerosas especies que incluye a las "avispa" parasíticas y las "verdaderas" avispas tales como las de las familias Sphecidae y Vespidae.* **Pollinisateur — Wikipédia** *Les plantes et leurs pollinisateurs ont co-évolué depuis l'apparition des plantes à fleur. Les relations qui les unissent sont parfois non-spécifiques (pollinisateurs généralistes) et parfois au contraire très spécifiques (pollinisateurs spécialisés) et de type interactions durables (un seul animal pouvant féconder une ou plusieurs plantes spécifiques).*
