Chemistry addresses topics such as how atoms and molecules interact via chemical bonds to form new chemical compounds. History of chemistry - Wikipedia The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...
