Free [EBOOKS] New Concepts In Cerebral Ischemia 1 PDF Thu, 06 Dec 2018 09:13:00 GMT Mild Therapeutic Hypothermia to Improve the Neurologic ... Concussion, also known as mild traumatic brain injury (mTBI), is typically defined as a head injury that temporarily affects brain functioning. Symptoms may include headaches, trouble with thinking, memory or concentration, nausea, blurry vision, sleep disturbances or mood changes. Some symptoms may begin immediately, while others may appear days after the injury. <https://en.wikipedia.org/wiki/Concussion> Watershed stroke - Wikipedia A watershed stroke or watershed infarct is defined as a brain ischemia that is localized to the vulnerable border zones between the tissues supplied by the anterior, posterior and middle cerebral arteries. The actual blood stream blockage/restriction site can be located far away from the infarcts. Watershed locations are those border-zone regions in the brain supplied by the major cerebral ...
