Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography. <https://en.wikipedia.org/wiki/Biodiversity> Why Is Biodiversity Important? Who Cares? — Global Issues Biodiversity is important, more than just the 'I want my children to enjoy it' reason. For example, the richness of diversity allows medicines and foods to be naturally available. The natural disaster prevention mechanisms in most ecosystems and other free services we all get from the surrounding environment are not easily replaceable or replicable, so maintaining biodiversity is important.
