Astrology - Wikipedia In Western astrology, astrological signs are the twelve 30° sectors of the ecliptic, starting at the vernal equinox (one of the intersections of the ecliptic with the celestial equator), also known as the First Point of Aries. The order of the astrological signs is Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces. https://en.wikipedia.org/wiki/Astrological_sign Pluto Ascendant Aspect: Becoming A Different Person Pluto is the god of underworld. As the governor of hidden depth in all things, Pluto represents hidden potentials, extreme passions (which are often repressed by society), and a perception that penetrates the darkness in all things – solving mysteries and unlocking new powers (think psychology and molecular physics).
