For instance, the polynomial $(3xy - 24x^2 - 7y + 56x)$ has no greatest common factor. In this case we can try searching the polynomial for factors that are common to some of the terms. Then we can attempt a method known as grouping. Take the polynomial and separate it into two groups. Science - Wikipedia Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...
